

# SENTRY

<https://sentry.io>

@batazor

# What is it?

Sentry's real-time error tracking gives you insight into production deployments and information to reproduce and fix crashes.

Trusted by:

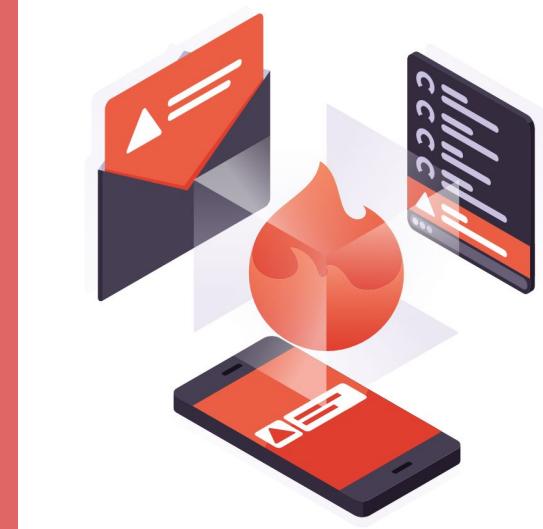

U B E R

# Know when things break

Get notifications via email, sms, or chat when new errors occur or old ones resurface.

## See the impact of each release

If things break, you'll know where errors are happening, how often they happen, and who is affected.

JS

ember

dj

php

Microsoft  
.NET

## Platforms

## Integrations

## Don't blindly guess

Sentry provides relevant information tags about your software, environment, and users that might have contributed to errors.

browser    Chrome 52.0.2743    browser.name    Chrome

environment    prod    level    error    logger    javascript

os    Mac OSX 10.11.1    os.name    Mac OS X

release    e18ddd07f08a9e42d1acee5cb1d48...

You can also submit optional custom data to help provide extra context or information that is unique to your business.

“What was the value of the shopping cart?”

“How many widgets were visible?”

“Was their game running in 32 bit or 64 bit mode?”

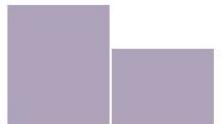

“Which clients' users are experiencing this bug?”

“Did the waxing gibbous cause the problem?”

# How to work?

1. Create project.
2. Get DSN-key in your application
3. PROFIT

	EVENTS	USERS
version. Use `dra...	3	1
	1	1
	5	1
	1	1
	1	1
